

Performance

Values are estimated and may vary. The [performance score is calculated](#) directly from these metrics. [See calculator.](#)

▲ 0–49 50–89 90–100

A screenshot of a web-based application titled "Actor Awards Visualizer". The main title is "Award Nominations". Below it, a sub-header says "Showing 10 of 6237 nominations". The interface includes a sidebar with filters for "Year", "Category", "Role", and "Search". The main area displays two nomination cards. The first card is for "ADAM DRIVER" in the year 2021, category "BEST SUPPORTING ACTOR", and role "Miles Teller". The second card is for "AL PACINO" in the year 2022, category "BEST SUPPORTING ACTOR", and role "The Irishman". Each card shows a small profile picture and a "Result" button.

PASSED AUDITS (29)

Show

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

CONTRAST

- ▲ Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

NAMES AND LABELS

- ▲ Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

NAVIGATION

- ▲ Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)
